

Just For Fun!!

Newspaper Spinners

What you need: uncarpeted space and newspaper sheets – one per person

As people enter the room have each person take a sheet of newspaper – just one sheet. Then instruct the group to fold their newspaper in half, and in half and in half continuing until they can no longer fold the paper and they end up with a square of newspaper about 2 inches or so on each side.

Now they will put this square under the toe of one foot and pushing off with the other foot spin around! They will be amazed at how fast they can spin on this tiny square of newspaper. Obviously, this only works on a non-carpeted floor!

When new people arrive have the folks who have already done the activity to teach someone else how to make their spinner.
